Professional Summary

Motivated Information Technology student at Ensign College with practical experience in cloud computing, technical support, Linux administration, networking, SQL, cybersecurity, and web development. Experienced in designing cloud infrastructure solutions, administering Linux systems, troubleshooting technical issues, and developing business websites. Strong background in customer service, operations management, and teamwork through professional experience at Auto Rehab Global Services. Passionate about using technology to solve business problems while maintaining integrity, continuous learning, and excellent customer service. Seeking an entry-level Cloud Solutions, Systems Administration, or IT Support role where I can continue developing my technical skills and contribute to organizational success.

Projects Experience

Hybrid Cloud Infrastructure Proposal

Designed a secure hybrid cloud solution for Auto Rehab Global Services using Microsoft Azure concepts. Developed recommendations for cloud storage, backup, disaster recovery, network security, and business continuity while balancing performance, scalability, and cost.

Skills Used

- Cloud Computing
- Microsoft Azure
- Networking
- Security Planning

FamilySearch Heritage Vault 2.0 Infrastructure Design

Designed a scalable Linux-based enterprise infrastructure that included monitoring, disaster recovery, cloud integration, and security planning for a global genealogy platform.

Skills Used

- Linux Administration
- Cloud Infrastructure
- Security
- Network Design

Linux Administration Labs

Completed hands-on Linux administration projects involving user management, storage configuration, shell scripting, permissions, package installation, and system maintenance.

Skills Used

- Ubuntu Linux
- Bash
- System Administration

SQL Database Projects

Designed and queried relational databases using SQL. Created tables, joined datasets, filtered records, and generated reports for business decision-making.

Skills Used

- SQL
- Microsoft SQL Server
- Database Design

Easy Guesty Website Internship

Remote Internship | Ensign College

Worked with a development team to improve the Easy Guesty website by enhancing user experience, implementing SEO strategies, and monitoring website performance using Google Analytics and Google Search Console.

Skills Used

- HTML

- SEO
- Google Analytics
- Website Optimization

Social Club Membership Spreadsheet Project

Developed a digital spreadsheet to improve membership and event record management for a local church organization, making records easier to organize, update, and retrieve.

Skills Used

- Microsoft Excel
- Data Organization
- Record Management
